

# Preparing Individuals with Autism for Life After High School (Part 1)

Dorothea C. Lerman, Ph.D., BCBA-D  
[lerman@uhcl.edu](mailto:lerman@uhcl.edu)

# A Drop in the Bucket?

Individuals With ASD  
Receiving Vocational Rehabilitation Services

UHCL Students with ASD  
Registered with Disability  
Services

<sup>1</sup> U.S. Department of Education, Office of Special Education Programs, Annual Report to Congress on the Individuals with Disabilities Act (retrieved 12/21/18)

# Preparing and Supporting Individuals with Autism For Success in Employment

# My Collaborators

- Carolyn Grob
- Justin Hunt
- Channing Langlinais
- Courtney Laudont
- Trena Rouse
- Natalie Villante
- Bridgette White
- Dan Wright

# Issues and Problems

# Employment of Individuals with ASD

- Employment Rates

Overall: 25% - 55% (Bush & Tasse, 2017; Newman et al., 2011; Shattuck, 2012)

With VR services: 37%-60% (Alverson & Yamamoto, 2017; Roux et al., 2016)

- Outcomes flat/declined across 10 yrs; access to services had minimal impact (Taylor & Mailick, 2014)
- Outcomes positively related to receipt of job-placement and on-the-job support services, BUT less likely to receive these (Nye-Lengerman, 2017)
- VR services more costly than for any other disability

# Potential Targets for Vocational Assessment and Intervention

# Potential Targets: What Should We Teach?

- Securing Employment
  - Completing applications
  - Interviewing
- General Vocational Skills
  - Following instructions
  - Managing time
  - Navigating job site
- Job-Specific Skills
- Job-Related Social Skills
  - Asking for assistance
  - Responding appropriately to feedback
- Problem Solving
- Hygiene/Grooming

# Why Vocational Difficulties?

- *Verbal report* of potential factors (Baldwin et al., 2014; Hurlbutt & Chalmers, 2004; Muller, Burton, & Yates, 2003)
  - Inadequate job training
  - Difficulty interacting with supervisors/co-workers
  - Unclear expectations
- VR primary impairment classification (Nye-Lengerman, 2017; Roux et al. 2016):
  - Psychosocial – ~45%
  - Cognitive – ~43%
  - Communication – ~4%

# Potential Targets:

## What Do Employers Care About Most?

### Surveys:

- Follows instructions
- Shares information
- Respects others / Offers to help
- Requests assistance
- Clarifies instructions
- Responds appropriately to criticism
- Is dependable/On time
- Shows personal integrity/honesty

(e.g., Foss & Peterson 1981; Ju et al. 2012; McConaughy et al 1989; Salzberg et al. 1986)

# Potential Targets:

## What Do Employers Care About Most?

### Reasons For Termination/Problems on the Job:

- ▣ Disruptive/distractive/anti-social behavior
- ▣ Lack of social awareness
- ▣ Interactions w/ supervisors & co-workers

(Butterworth & Strauch, 1994; Cheney & Foss, 1984; Ford et al., 1984; Greenspan & Shoultz, 1981; Mueller, 1988)

# Potential Targets: What Should We Teach?

## Some Examples

- Securing Employment
  - Completing applications
  - Interviewing
- General Vocational Skills
  - Following instructions
  - Managing time
  - Navigating job site
- Job-Specific Skills
- **Job-Related Social Skills**
  - Asking for assistance
  - Responding appropriately to feedback
- **Problem Solving**
- Hygiene/Grooming

# Research on Vocational Interventions for Individuals with Autism

- Focus on those with more severe disabilities
- Few target “soft skills” related to *job retention*

# Assessing Job-Related Social Skills

- Caregiver or Staff Interviews/Checklists 
  - Scale of Job-Related Social Skill Performance (SSSP; Bullis et al., 1993)
- Client Verbal Report (Self-report/Knowledge-based tests)
  - Test for Interpersonal Competence for Employment (TICE; Bullis & Foss, 1986); Scale of Job-Related Social Skill Knowledge (SSSK; Bullis et al., 1993)

NUMBER 1 (WINTER)

## *ASSESSING AND TEACHING JOB-RELATED SOCIAL SKILLS TO ADULTS WITH AUTISM SPECTRUM DISORDER*

CAROLYN M. GROB, DOROTHEA C. LERMAN, CHANNING A. LANGLINAIS AND  
NATALIE K. VILLANTE

UNIVERSITY OF HOUSTON—CLEAR LAKE

# Clinic-Based Vocational Social and Problem-Solving Skills Assessment and Intervention

Approach for providing assessment/intervention if

- Individual not currently employed
  - Limited/no access to job site
  - Limited resources
- Goal: Evaluate skills directly and efficiently
  - Employee “workroom,” “supervisor’s office,” “break room”
  - Supervisor absent; all sessions videotaped
    - “I will be in my office; let me know if you need anything”
  - 10- to 15-min work sessions

# Typical Tasks

- Folding shirts
- Rolling/sorting silverware
- Sorting objects
- Stuffing envelopes
- Stapling papers
- Alphabetizing books/folders/envelopes
- Cleaning room
- Stocking shelves
- Computer-related jobs (data entry, web searches, word processing)

© Can Stock Photo

## Behaviors<sup>1</sup>

- Confirming statements
- Request help – materials
- Request help – task
- Request help – completion
- Response to corrective feedback

## Evocative Situations

- Task instructions / feedback
- Materials missing/broken, equipment malfunctions
- Vague instructions
- Task not in repertoire
- Not enough work
- Corrective feedback (clear, vague, conflicting)

<sup>1</sup>Drawn from Butterworth & Strauch (1994); Ju, Zhang, & Pacha (2012); Montague & Lund (2009); Partington & Mueller (2015) and others

## NEW! Problem-Solving Skills

### Problems (Evocative Situations)

- Supervisor missing from office
- Given unfamiliar task
- Materials missing/broken, equipment malfunctions
- Work completed

### Behaviors

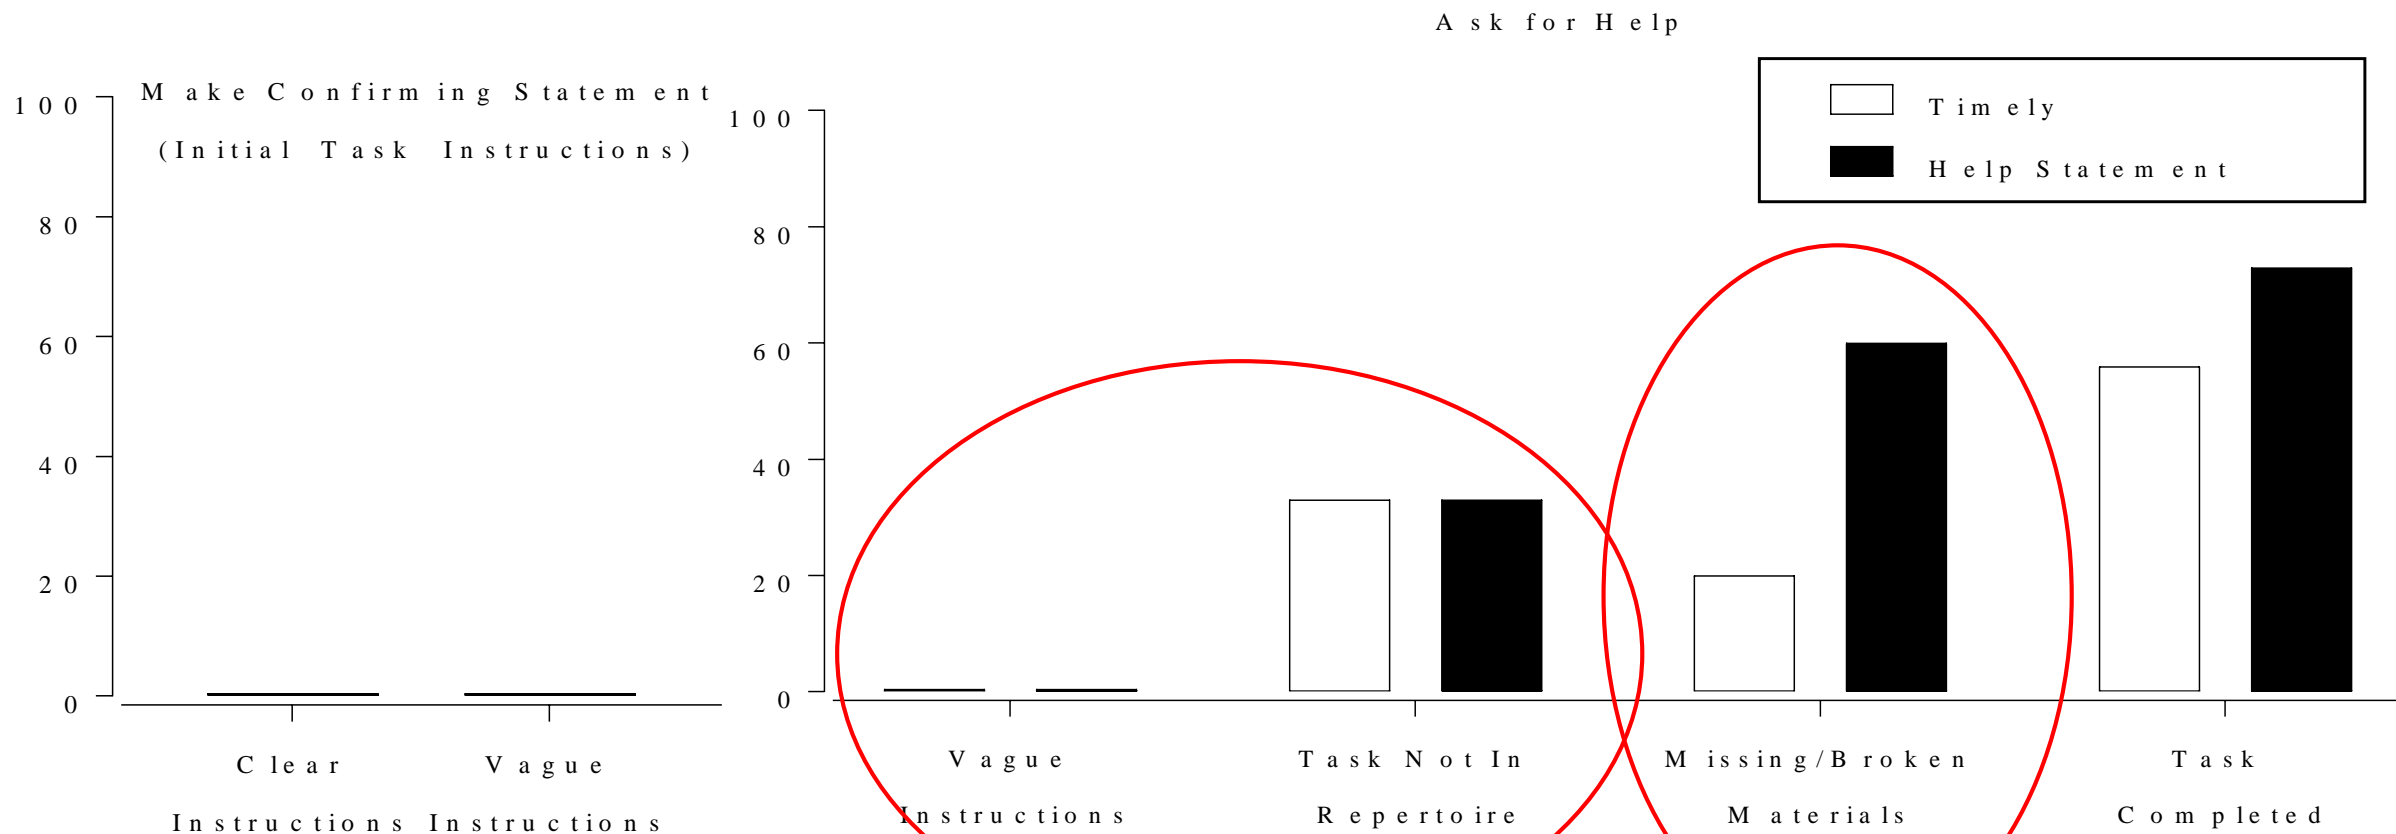

- Complete other work; search again
- Search for task instructions, then supervisor if needed
- Search for necessary materials or equipment, then supervisor if needed
- Complete other work if available, then search for supervisor

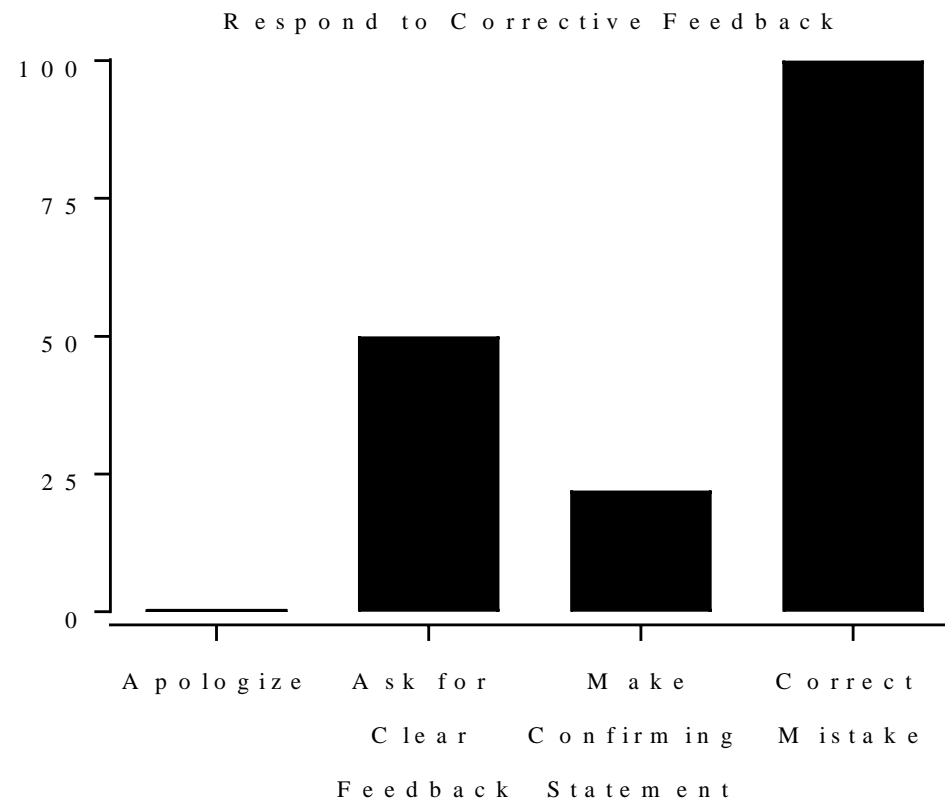

# Example Assessment:

Arthur: age 19; ASD; high school degree; volunteer experience

Percentage of Opportunities (Correct)

Percentage of Opportunities (Correct)

# Intervention

*ASSESSING AND TEACHING JOB-RELATED SOCIAL SKILLS TO  
ADULTS WITH AUTISM SPECTRUM DISORDER*

CAROLYN M. GROB, DOROTHEA C. LERMAN, CHANNING A. LANGLINAIS AND  
NATALIE K. VILLANTE

UNIVERSITY OF HOUSTON—CLEAR LAKE

## Considerations

How to provide effective intervention if

- Individual not currently employed
- Limited/no access to job site

## Ideal interventions

- Efficient, low-cost, nonintrusive
- Transfer from therapy setting to job site
- On-site supervisors willing to implement

## Grob et al. (2019)

- Brief Behavioral Skills Training (BST)
- Stimulus (Text) Prompts

Sequential introduction of additional components; require increasing amount of “buy in” from supervisor

- Antecedent (Vocal) Prompts
- Feedback
- Tangible reinforcement

# Brief BST + Stimulus Prompts

- Components
  - Written/Spoken Instruction
  - Examples / Modeling
  - Practice (Role Play)
  - Feedback

- Text/pictures to cue participant (“help sheets”)

# Stimulus (Text) Prompts

I understand.

I got it.

That makes sense.

I can do that.

I will do that.

Consider it done.

# Stimulus (Text) Prompts

Can you show me how?

Could you demonstrate it?

I need a model.

How do I do it?

# Stimulus (Text) Prompts

## Problem Solving

Have I done this task before?

Did the supervisor give an example ?

# Brief BST + Stimulus Prompts

- Performance criterion (6 consecutive)
- “Test” in relevant assessment situation(s)
- Stimulus prompts present in tests
- BST booster if performance criterion not met

# Additional Components

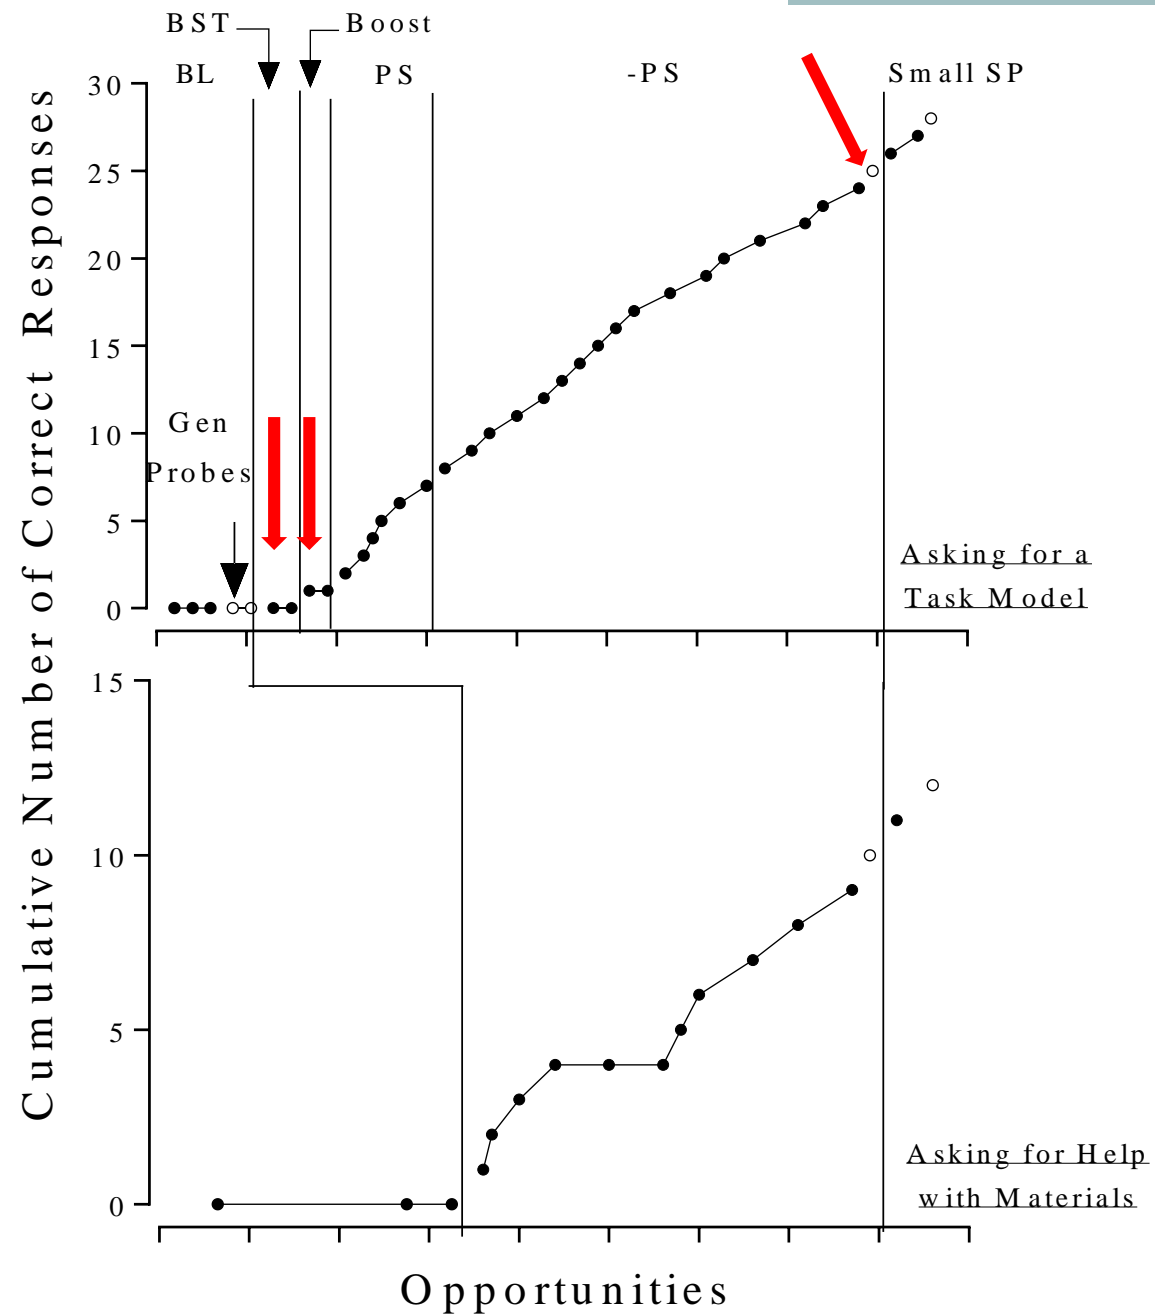

- Verbal prompt immediately prior to session
- Immediate feedback
  - Descriptive Praise
  - Correction
- Immediate feedback + tang Sr:
  - Tangible (e.g., \$) + Descriptive Praise
  - Correction

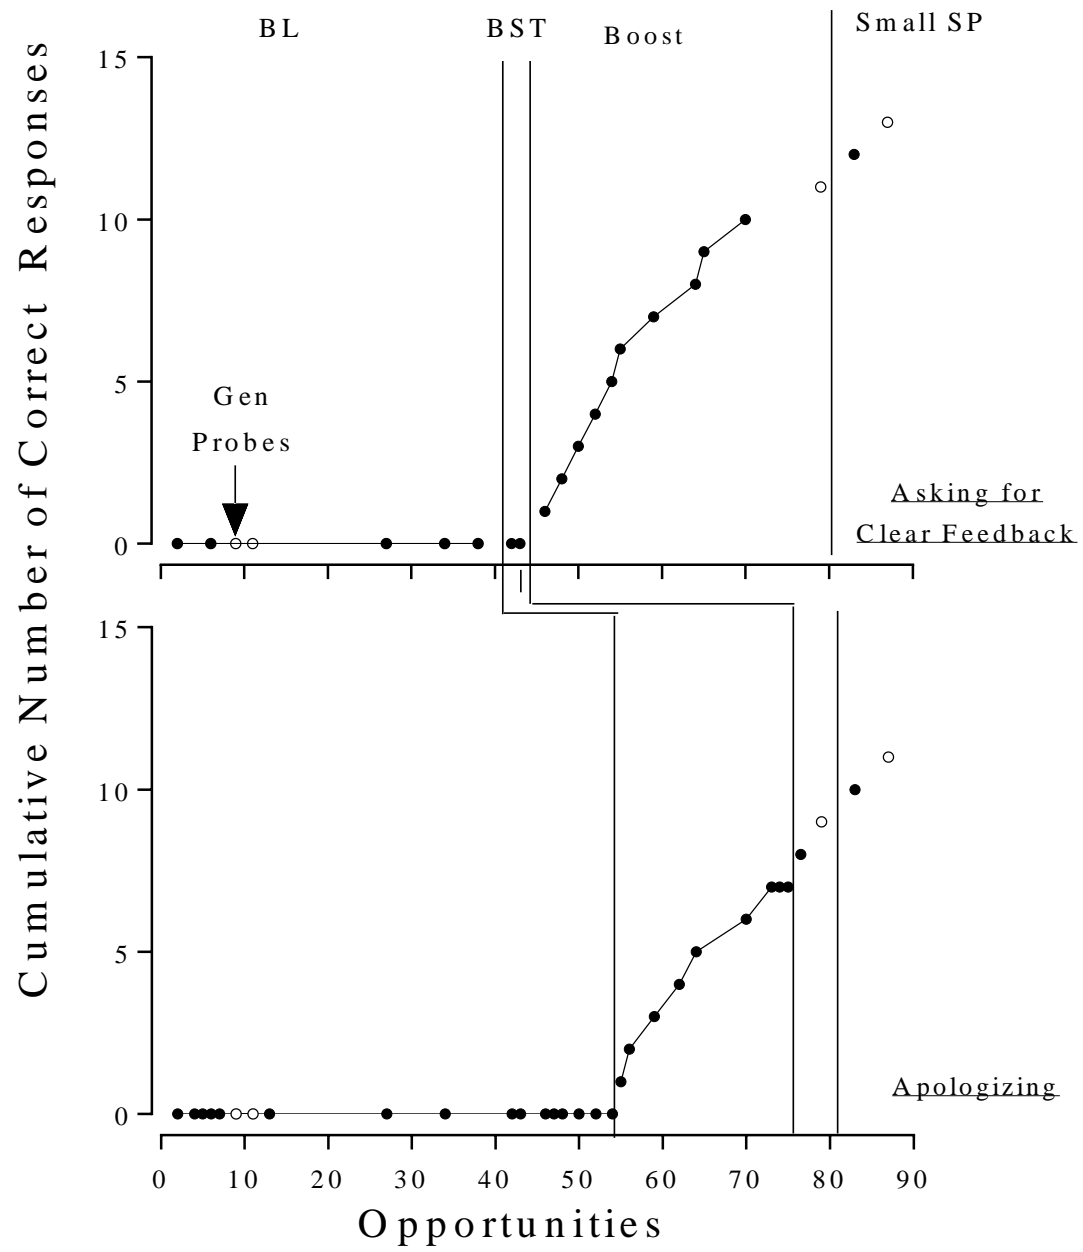

- Participants

- Arthur: age 19; ASD; high school degree; volunteer experience
- Jerry: age 27, ASD, A.A in Criminology & A.A.S. in Information Technology Security; no experience
- Vanessa: age 19, ASD, ADHD; high school degree; volunteer experience

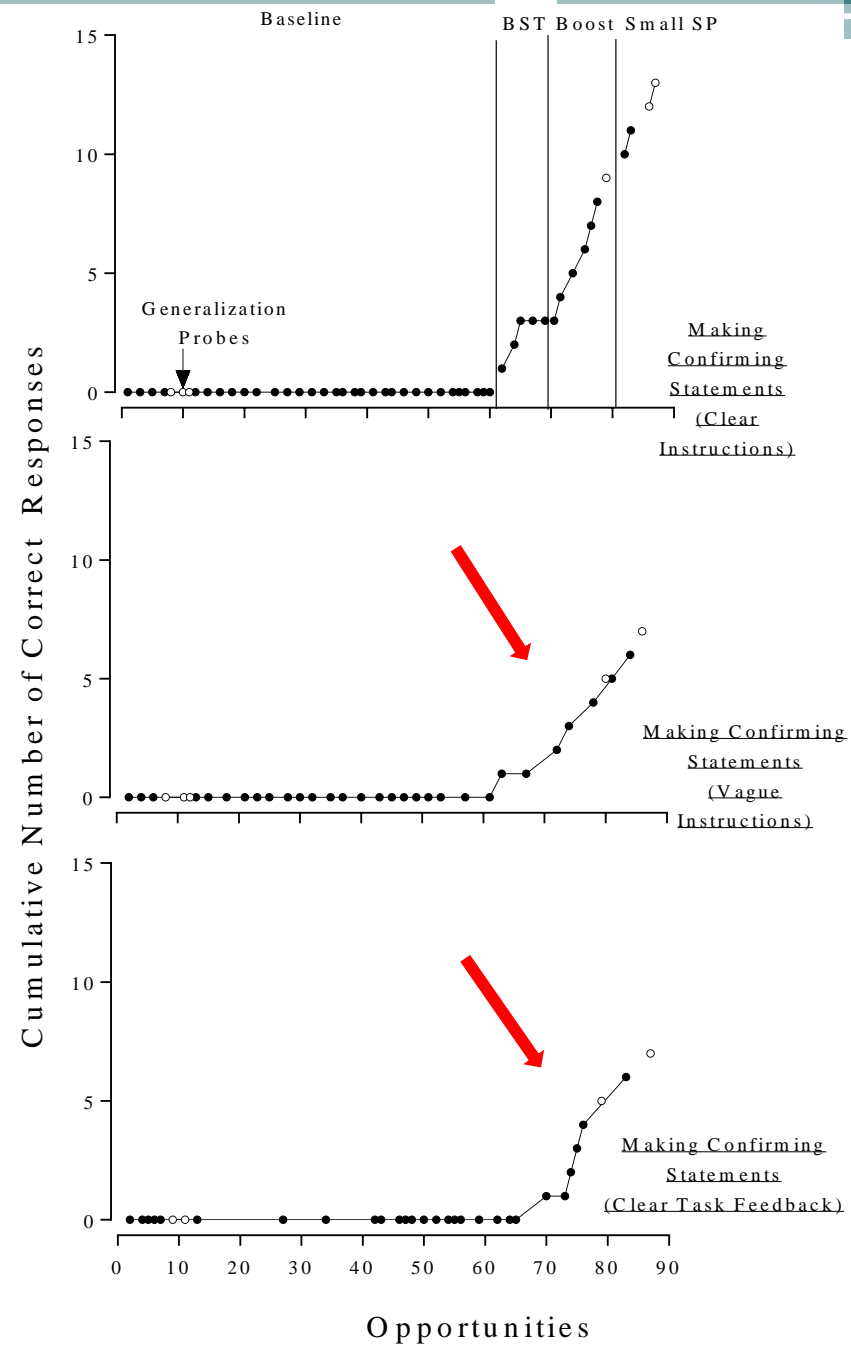

# Arthur

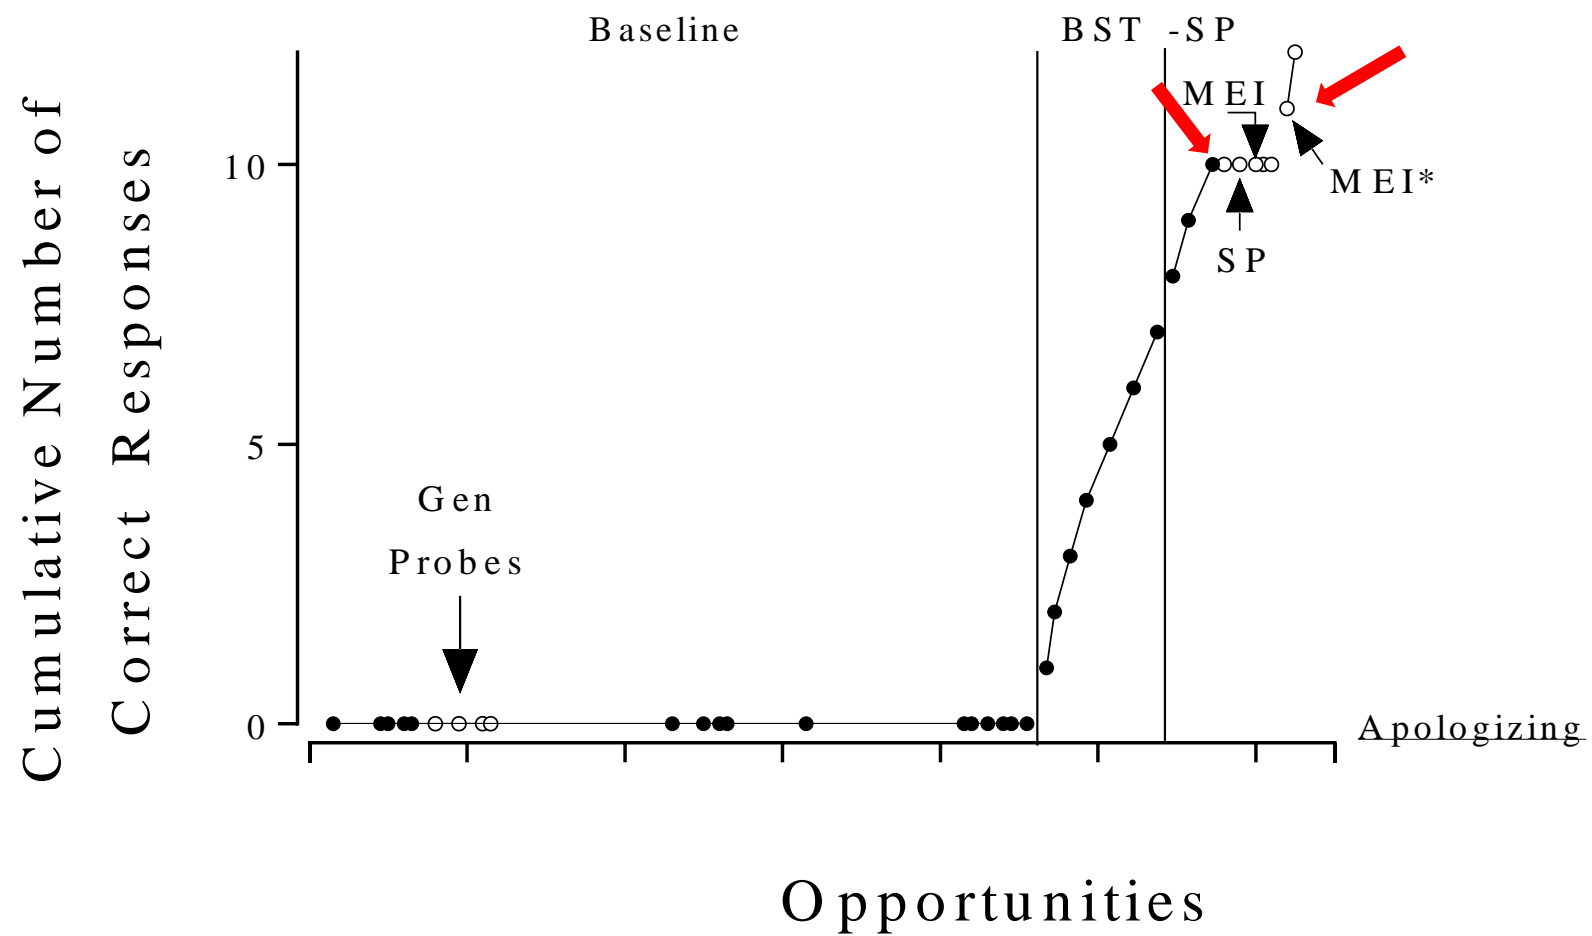

# Arthur

# Arthur

# Jerry

# Vanessa

## Conclusions

- Brief BST + stimulus prompts effective for 2 of 3 participants
- Stimulus prompts critical to generalization?
- Will these skills help them keep their jobs?
- Current focus: Problem-Solving Skills

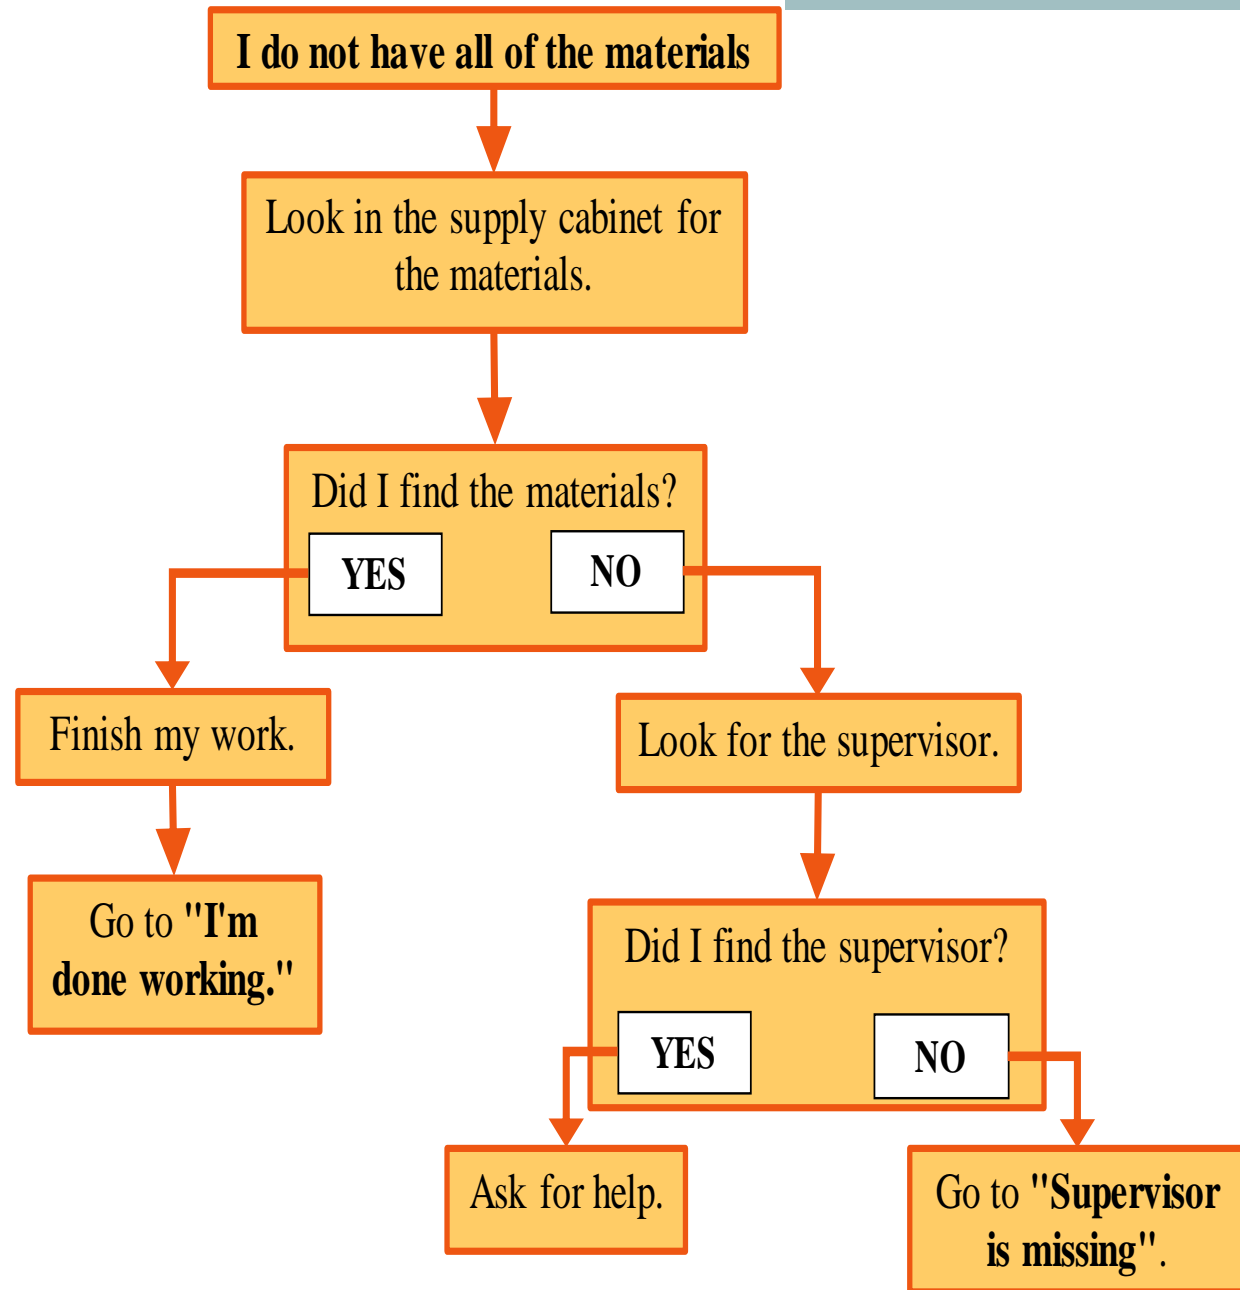

# Villante, Lerman, Som, & Hunt (in preparation) Teaching Adults with Developmental Disabilities to Problem Solve Using Electronic Flowcharts in a Simulated Vocational Setting

- What is problem solving?
  - Manipulating environmental stimuli that evoke resolving responses
  - Generating supplemental stimuli (e.g., spoken or written instructions) that function as  $S^D$ 's for responses that may solve the problem (Donahue & Palmer, 2004; Skinner, 1984)

## Villante et al. (in preparation)

- Prior Research
  - Focused on one type of problem
  - Taught one solution to the problem
  - Used strategies that may be inappropriate on job site
  - Taught solutions rather than problem solving
- Lora et al. (2019)
  - Taught use of activity schedules (S<sup>D</sup>'s for obtaining task material)
  - Did not report data on use of activity schedule (problem solving)
  - Taught to solve one type of problem and solution
- Flowcharts to identify solutions (Palmen & Didden, 2012)
- Electronic modality (ipod, smartphone)

# Electronic-based Flowcharts

\* Required

What do I need? \*

☐ I need materials

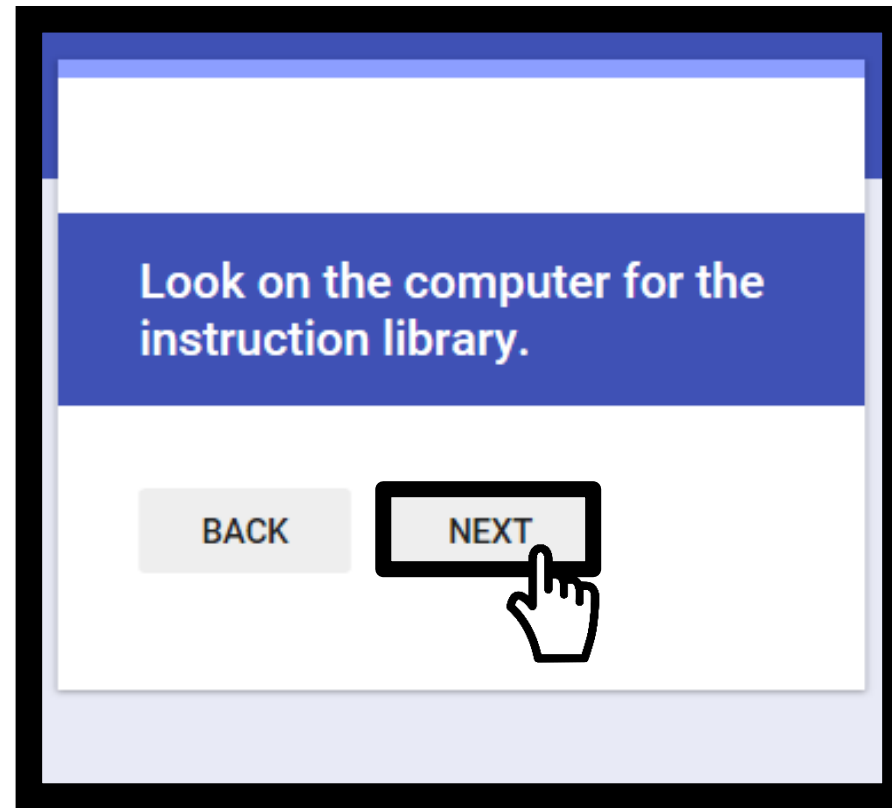

☒ I don't know how to do my work

☐ The supervisor is missing

☐ I'm done working

NEXT

# Electronic-based Flowcharts

# Electronic-based Flowcharts

\* Required

Did I find the instructions?

\*

☒ Yes

☐ No

☐ I need to start over

BACK NEXT

- Participants

- Zeke: age 17; ASD; Vineland – 79; home schooled; volunteer experience
- Blake: age 25, ASD, Generalized Anxiety/ADHD, IQ – 79; high school degree; part-time employment (4 hrs/week)

# Brief BST

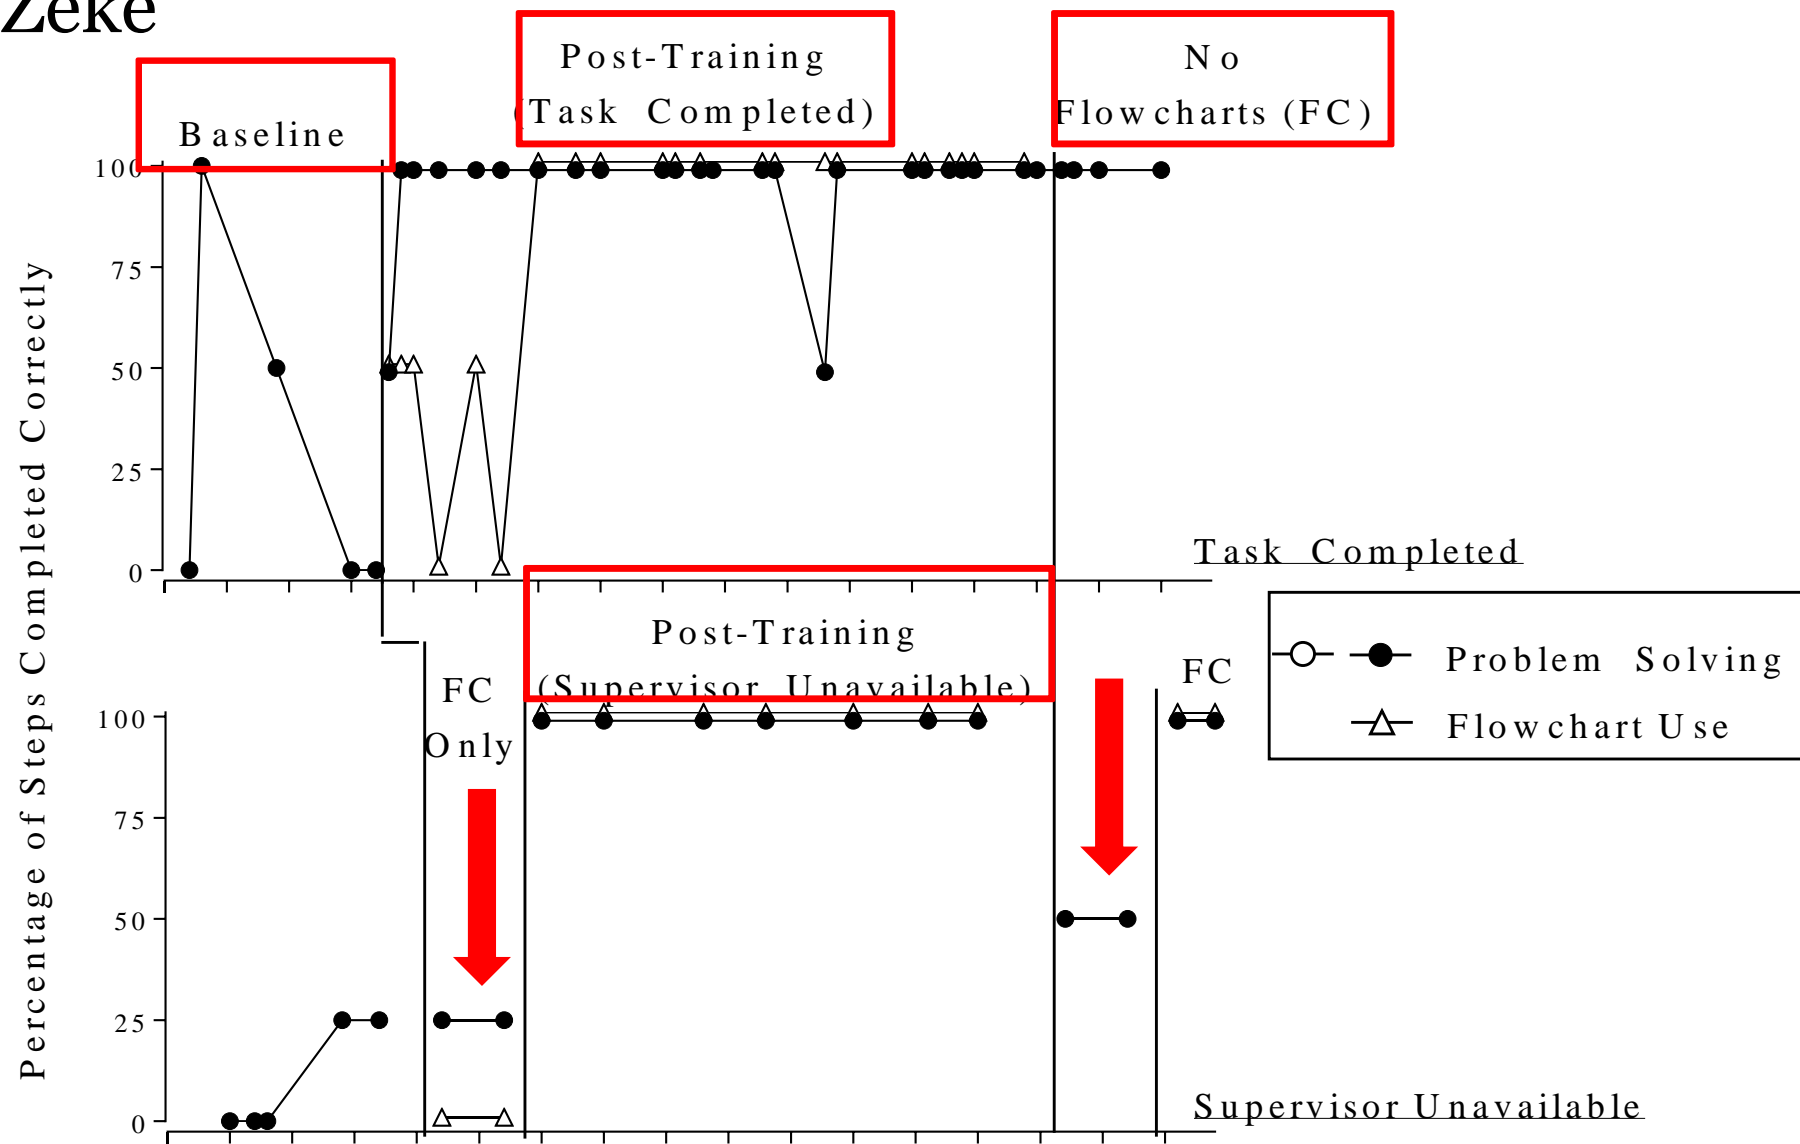

- Identify problems from video examples
- Use electronic flowchart to solve one problem
  - Instructions
  - Modeling
  - Practice (Role Play)
  - Feedback

# Zeke

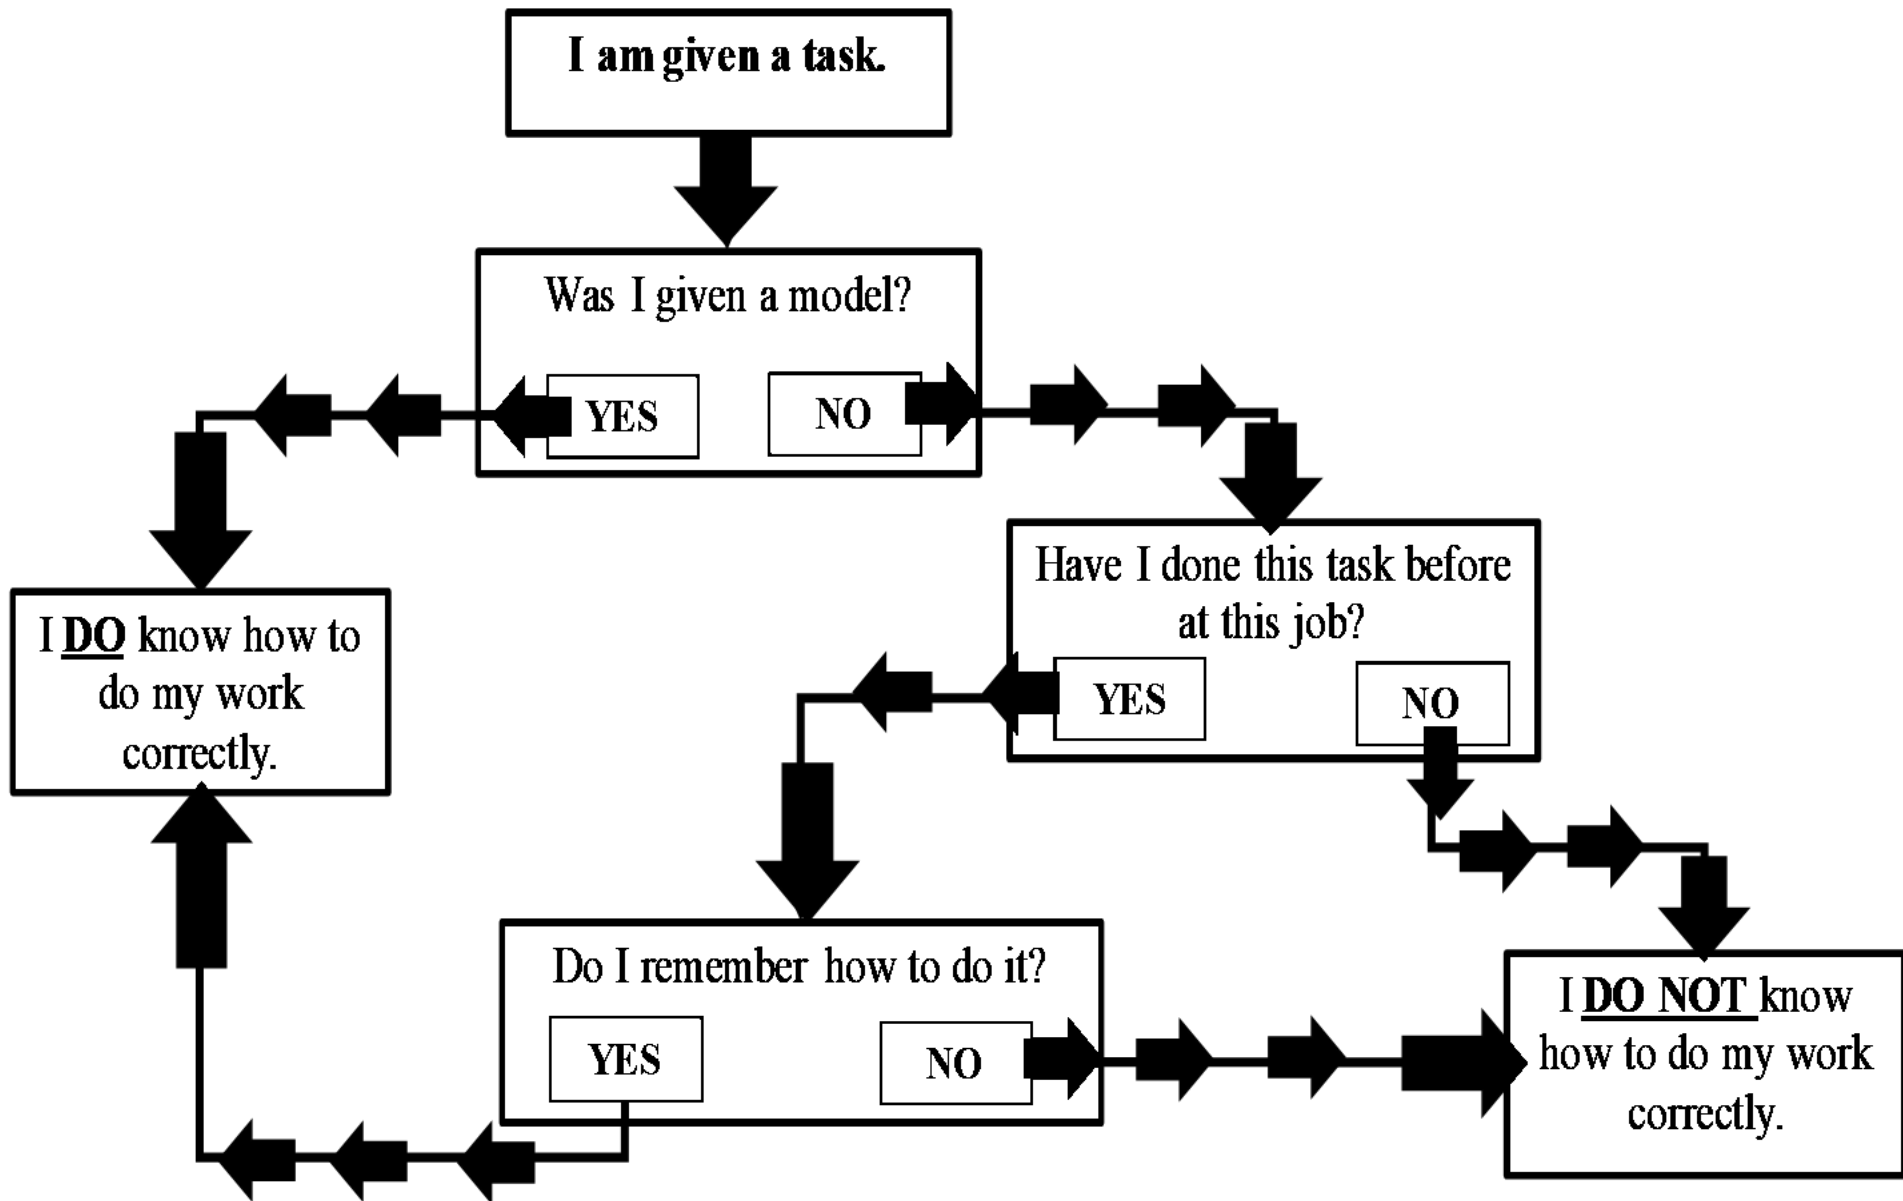

# Zeke

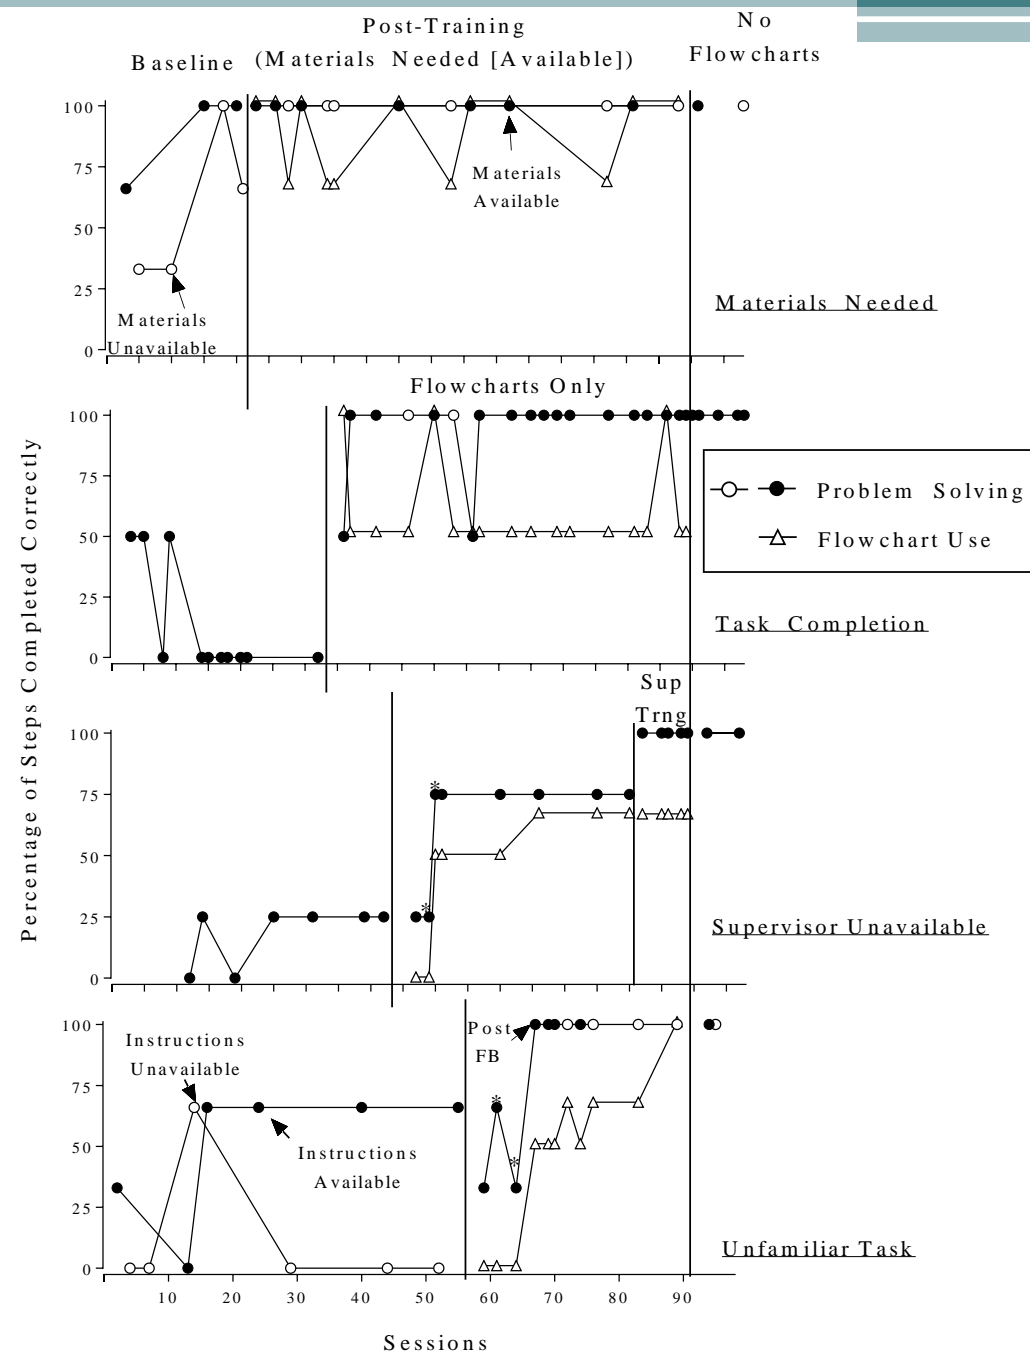

# Zeke

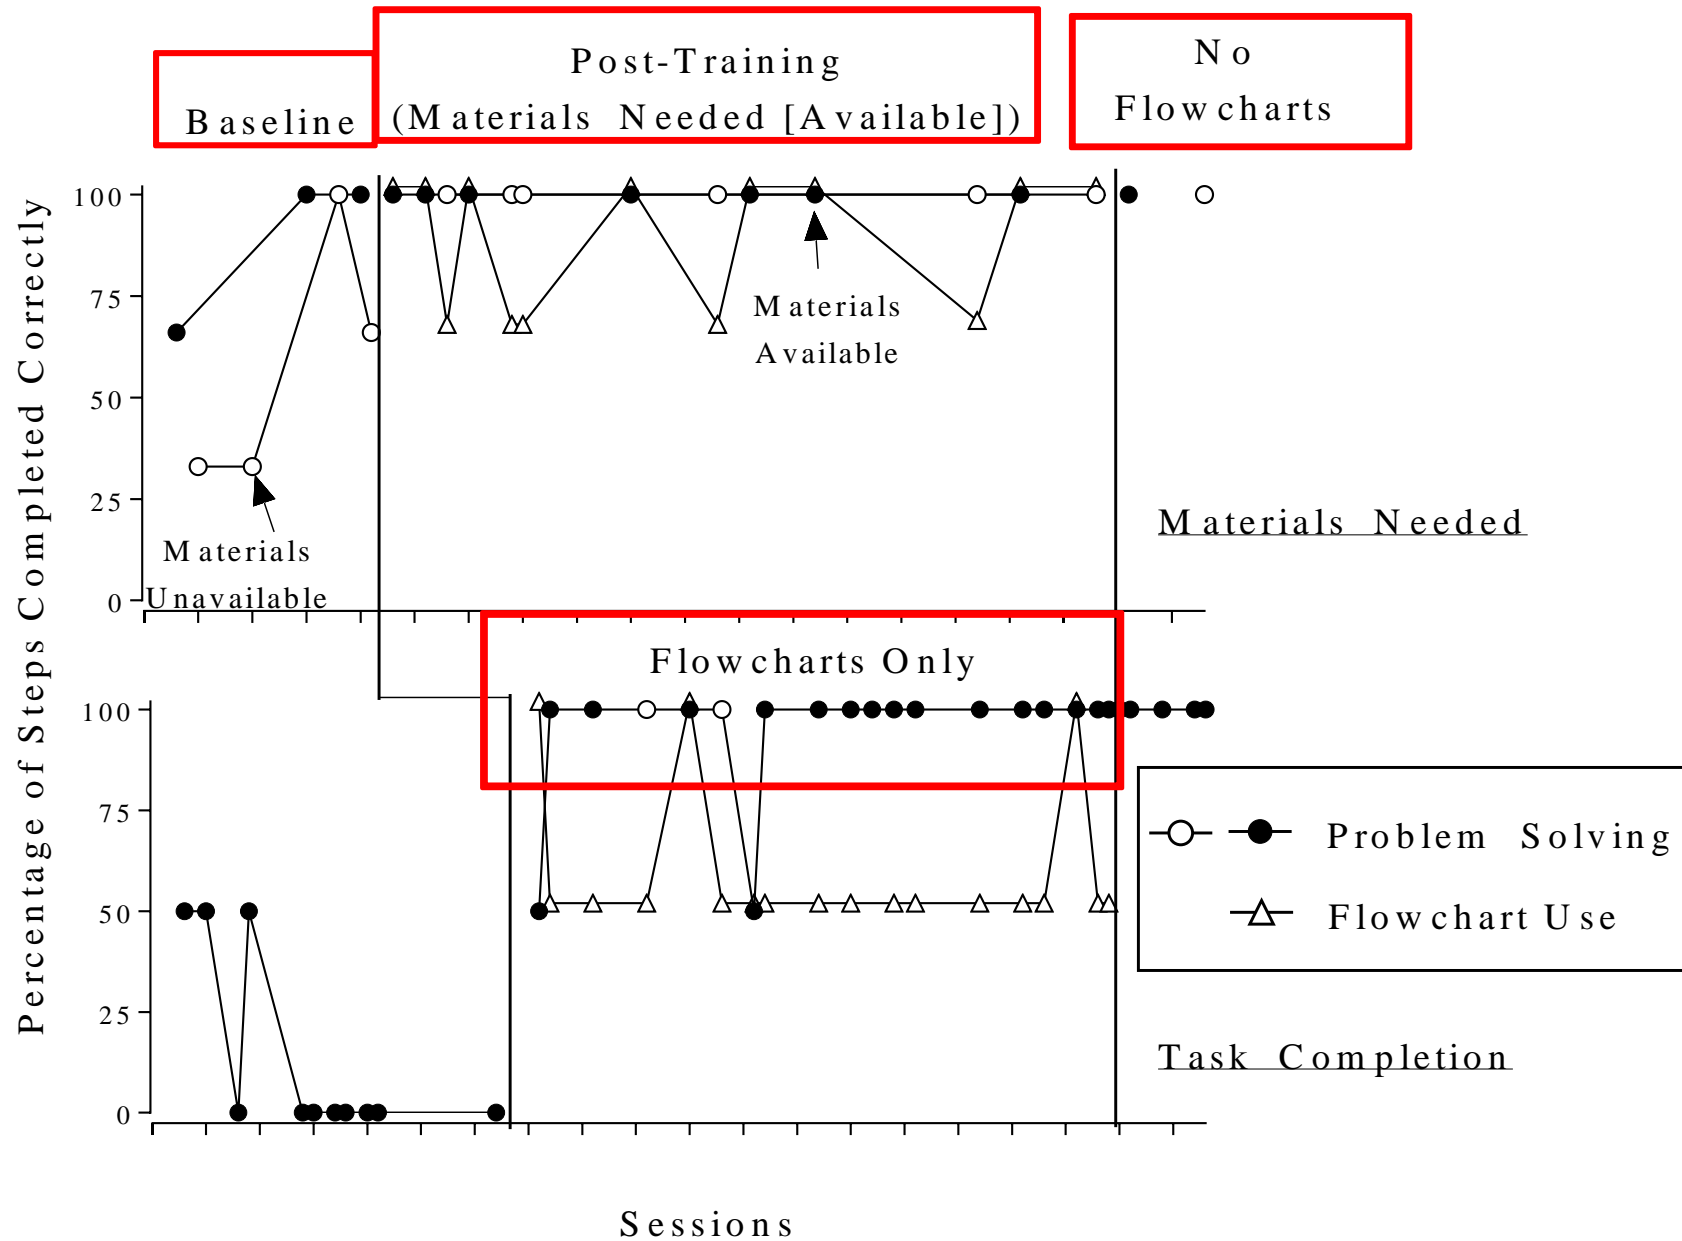

Blake

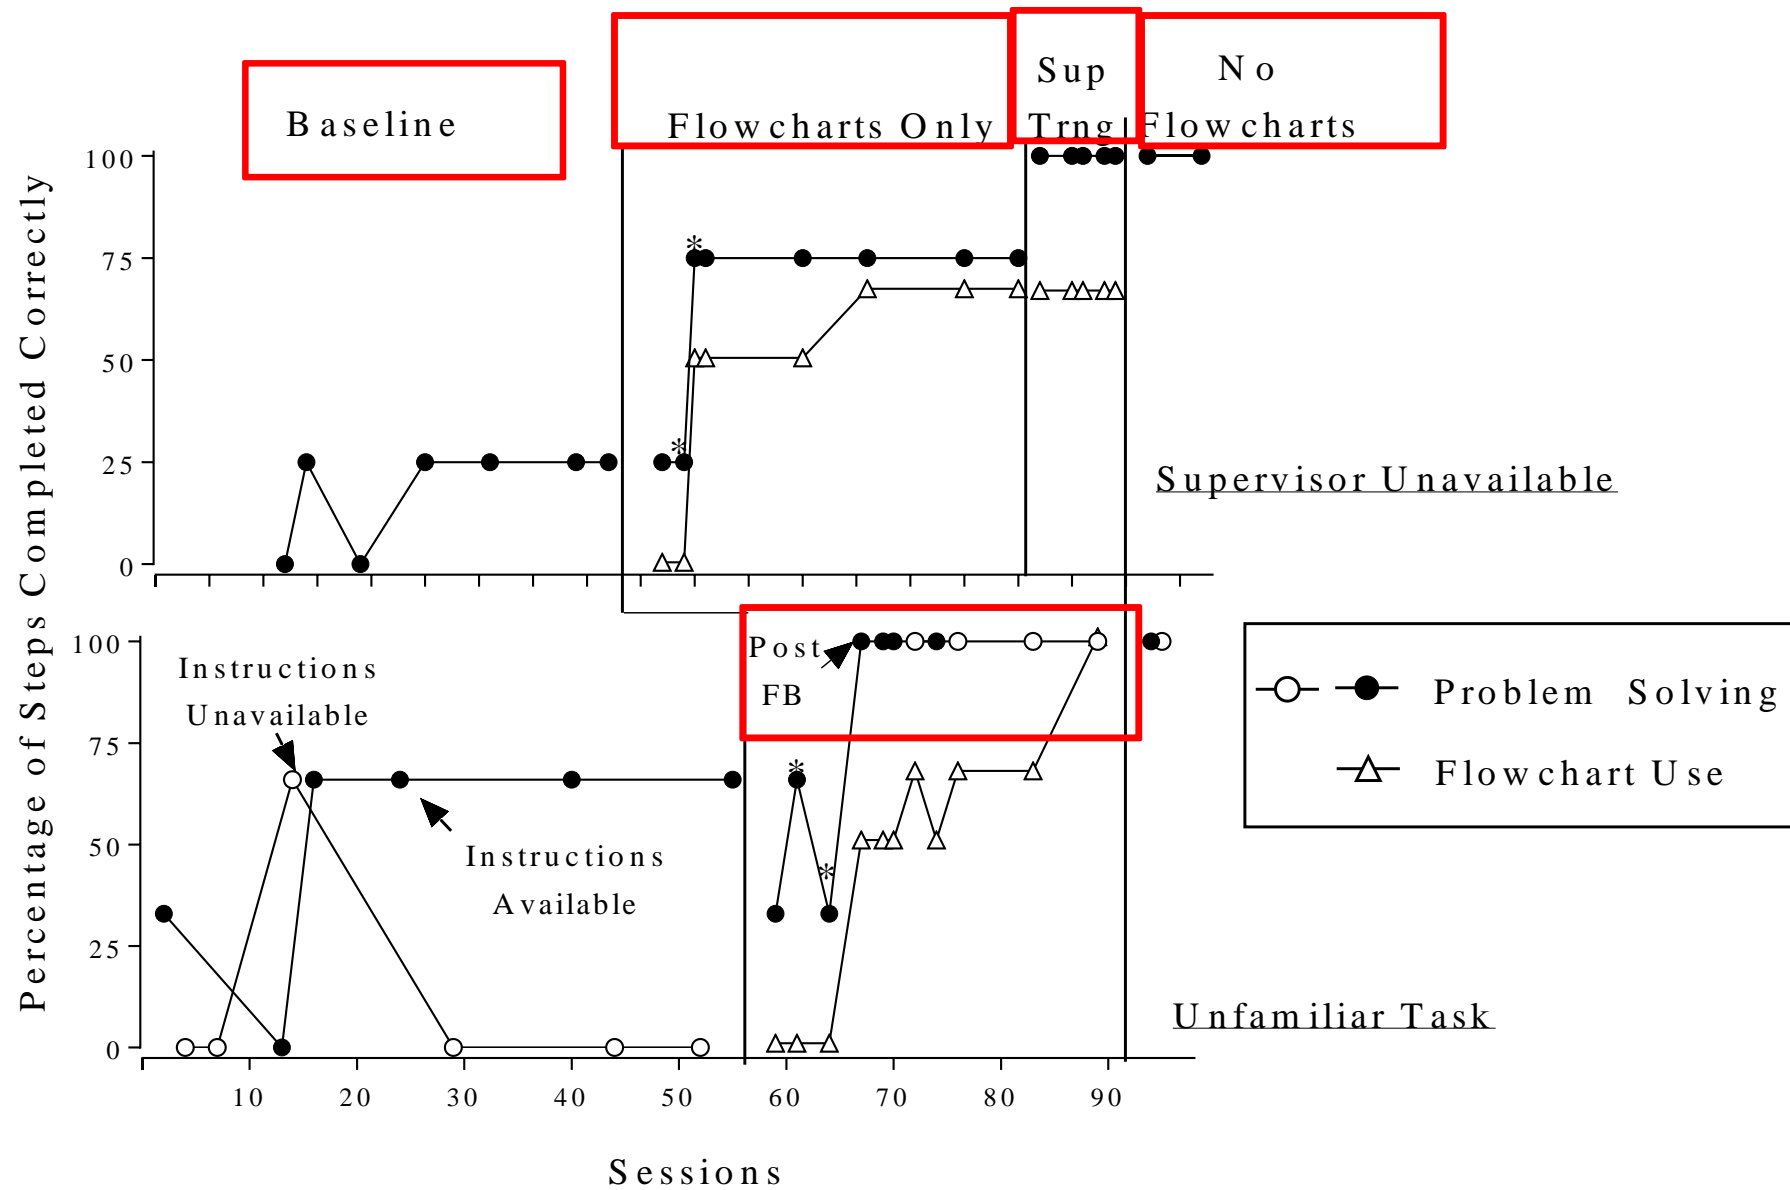

# Blake

# Blake

# In Summary.....

- Youth with ASD are inadequately prepared and supported
- Transition to work is HUGE
  - Success requires large number/variety of skills
- Behavior analysts have much to offer in this area!
- Start EARLY!
- Don't forget about the “soft skills”

# QUESTIONS?

Dorothea C. Lerman, Ph.D., BCBA-D
